```

The diagram illustrates a sequence of message merging. On the left, there are four pairs of 'BYE' messages. The first pair (M1) and the second pair (M2) are connected to a central node labeled M5. The third pair (M3) and the fourth pair (M4) are connected to a central node labeled M6. These two intermediate nodes, M5 and M6, are then connected to a final node labeled M7. A single line extends from node M7 to the right, representing the final output of the merging process.
